

Member Notice of Authorized DAO Resources

Type: Notice

Thesis.

To ensure Movement DAO's members and contributors are aware of important changes to the DAO's official links for certain online properties, Authorized Members tankbottoms.eth and benreed.eth are verifying which DAO links and online properties the community should use. By updating the official links, the Authorized Members seek to minimize potential confusion, prevent the spread of misinformation, streamline communications to the community, and ensure the DAO operates accurately and transparently.

Motivation.

Recent actions taken by former founding members of Movement DAO (hereafter the "DAO") have intentionally restricted and blocked administrative access of other core community members to certain DAO applications and online properties. As a result, these properties can no longer be relied upon and trusted by the community as an accurate source of information from the DAO. Therefore the Authorized Members desire to fully notify the DAO community of enacted changes to official DAO links which will allow the DAO and its members to freely engage with one another, consolidate core messaging and communications under the IRL affiliate, DAOLABS, and retire unverified and outdated applications and online properties.

Specification.

This section is intentionally left blank.

2. Social Media: https://twitter.com/move_xyz ²
3. Podcast: Podbean
4. Notion: Notion (*Internal content repository & project management*)
5. Instagram: Instagram ³

Rationale.

The DAO's links were updated for the following reasons:

- To inform DAO members and contributors of recent changes to the DAO's messaging and communication channels;
- To ensure the community continues to freely engage with one another; and,
- To reduce the chance of misinformation, censorship, and/or torturous interference with DAO operations by recently removed founding members.

Risks.

- There could be better avenues of communication;
- Historical context is lost when changing Discord servers;
- Former online properties still exist and could be used by bad actors to inflict harm on the DAO; and,
- Lack of brand clarity could confuse less informed community members.
